**REISSUE APPLICATION DECLARATION AND POWER OF ATTORNEY
BY INVENTOR**

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name. I believe I am an original, first and joint inventor of the subject matter that is described and claimed in patent number 5,981,860, granted on November 9, 1999, and in the foregoing specification, and for which a reissue patent is sought on the invention entitled SOUND SOURCE SYSTEM BASED ON COMPUTER SOFTWARE AND METHOD OF

GENERATING ACOUSTIC WAVEFORM DATA, the specification of which is attached hereto.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to the examination of this application in accordance with 37 C.F.R. § 1.56(a) and (b).

I hereby claim foreign priority benefits under 35 U.S.C. § 119 of any foreign application(s) for patent or inventor's certificate or of any PCT international application(s) designating at least one country other than the United States of America listed below and have also identified below any foreign application(s) for patent or inventor's certificate or any PCT international application(s) designating at least one country other than the United States of America filed by me on the same subject matter having a filing date before that of the application(s) of which priority is claimed:

N/A			<input type="checkbox"/> YES <input type="checkbox"/> NO

I believe the original patent to be wholly or partly inoperative or invalid by reason of the patentee claiming more or less than the patentee had the right to claim in the patent. All errors corrected in this reissue application arose without any deceptive intent on my part. At least one error upon which reissue is based is that I failed to claim a system for synthesizing a musical

tone according to control information in which a processor executes a process of providing control information at a variable period and a controller controls the variable period according to the detected load of the processor.
